

# SIEVE ANALYSIS - SAMPLE

Revised: 03.01.2026

Material analyzed in a CAMSIZER from Retsch Technology.

Measuring principle: Dynamic Image Analysis (ISO 13322-2:2006)

Minimum 80% of the material is within the specified particle size range indicated in the Technical Data Sheet.

Note: To prevent agglomerates, SiO<sub>2</sub> (ULTRASIL® VN3) is added to the material prior to the analysis.
